

## Software Developer

London, UK | +447938781624 | anamariatxt@gmail.com

## PROFILE

---

Full Stack Developer with experience in building and deploying web applications using **Python, Flask, Django, SQL**. Skilled in designing **RESTful APIs**, automating workflows and managing databases. A strong communicator with a background in business and design, bringing analytical thinking and a user-focused approach. Writing clean, scalable code and delivering robust solutions.

## SKILLS

---

Python | Flask | Django | SQL | JavaScript | REST APIs | PostgreSQL | MySQL | Unit Testing | Jupyter  
Pandas | NumPy | Postman | AWS | CI/CD | Git | GitHub | Apify | HTML | CSS | Bootstrap | OOP | Agile

## EXPERIENCE

---

### Full Stack Developer – Freelance Sep 2024 – Present

- Developing backend tools and financial applications using Python, Flask, Django, SQL.
- Building RESTful APIs to connect frontends with PostgreSQL, MySQL databases.
- Integrating third-party APIs and webhooks (Apify, n8n) into automated backend workflows.
- Creating responsive, user-friendly frontends with JavaScript, HTML, CSS, and Bootstrap.
- Writing unit tests (Pytest, Unittest) to ensure stability and deploying apps to Heroku and Render.
- Collaborating with clients to translate business requirements into functional web tools

### Assistant Manager – SageBrown Feb 2024 – Mar 2025

- Led a team and mentored junior staff while increasing bespoke order sales volume.
- Developed a tracking system for bespoke orders, improving production efficiency.
- Promoted from Sales Associate based on strong performance, leadership and initiative.

### Software Engineering Trainee – HyperionDev Nov 2023 – Sep 2024

- Gained practical experience through building back-end applications with Python, Flask, SQL.
- Practiced Agile-style development with peer reviews and sprint-based task tracking.
- Integrated third-party APIs and applied OOP principles in multi-file Python applications
- Used Pandas and NumPy for data manipulation and analysis in backend workflows.
- Managed cloud deployments and continuous integration with AWS and CI/CD pipelines.

## PROJECTS

---

### LinkedIn Jobs Finder – Data Scraping & n8n Workflow ([Portfolio](#))

- Job search tool that lets users filter LinkedIn job listings by title, location, experience, etc..  
Scrapes LinkedIn data using Apify and automates search workflows with n8n. The frontend is built with Flask, MySQL for data storage, and RESTful API integration to show filtered job results.

### Track & Thrive – Cryptocurrency Platform ([GitHub](#))

- Cryptocurrency tracker developed with JavaScript, Node.js, Express.js, Axios, and Bootstrap CSS. The app uses CoinGecko's API to display real-time cryptocurrency data with key metrics. Fully responsive UI with pagination, customisable display options clickable rows and more.

### TikTok Insider ([GitHub](#))

- A Python tool that scrapes TikTok data from popular videos (views, likes, hashtags, etc.) using Apify. Structures data for easy analysis, useful for content strategy and marketing insights.

## EDUCATION

---

HyperionDev – Software Engineering Bootcamp | Nov 2023 – Mar 2024

London College of Fashion, UAL – BA (Hons) Fashion Design & Development | Sep 2018 – Jul 2022
